

ARIZONA'S WORKFORCE

A press release from the Arizona Dept. Of Economic Security, Research Administration

State Has Less-Than-Seasonal Job Losses in July; Five of 11 Major Industries Record Gains

Arizona's seasonally adjusted unemployment rate was 4.9 percent in July, up from 4.4 percent in June. Unemployment levels rose while employment showed a modest decline. Meanwhile, nationally, the jobless rate for July was unchanged at 5 percent.

Arizona had a less-than-seasonal loss of 17,400 nonfarm jobs in July. Despite these losses, five out of the 11 major industry groups recorded gains — construction; trade, transportation and utilities; professional and business services; other services; and financial activities. Over-the-year job growth accelerated to 98,500 nonfarm jobs since July 2004, or a growth rate of 4.2 percent.

Other services posted a gain of 1,300 jobs, representing the largest percentage over-the-month gain among major industry groups in July. The 10-year average trend for this industry in July is a seasonal loss.

Construction had the next most rapid monthly gain for super sectors with an increase of 2,600 jobs, with gains widespread across construction subsectors. Since July 2004, this industry group has gained 23,500 jobs, representing 12-month growth of 12.2 percent.

Trade, transportation and utilities posted a gain of 1,500 jobs that was contrary to the 10-year average loss. Wholesale trade had a slightly greater-than-average loss of 800 jobs, while retail trade had a greater-than-average gain of 1,800 jobs. Increases were recorded in the retail sectors of general merchandise (+1,200), department stores (+100) and motor vehicles and parts (+600). Utilities reported an increase of 100 jobs, while transportation and warehousing had a gain of 400 jobs. For the second consecutive month, air transportation had a gain of 100 jobs. However, truck

transportation reported a loss of 100 jobs in July.

Over-the-year July changes showed a different transportation scenario with air transportation having a loss of 300 jobs and trucking recording a gain of 200 jobs.

Professional and business services had a gain of 1,000 jobs in July, quite the opposite of the 10-year average trend. Increases were recorded in most sectors including professional, scientific and technical services (+300), management of companies and enterprises (+100) and employment services (+900). However, losses occurred in the sectors of business support services (-200) and services to buildings and dwellings (-100). July marked the fourth consecutive month of reductions for business support services. Overall, the professional and business services industry showed a gain of 13,000 jobs since July 2004, up nearly 4 percent.

Financial activities had an increase of 500 jobs, which was

(continued on page 2)

less than the 10-year average for July. Gains were recorded in most sectors with the exception that employment levels were unchanged in the insurance, and securities, commodity contracts sectors.

Government reported the majority of July's seasonal losses with a reduction of 16,200 jobs because of the continued reporting of faculty and staff on summer break at public education institutions. State and local education had a combined loss of 15,900 jobs. The federal government also reported a loss of 600 jobs.

Leisure and hospitality reported 4,200 seasonal-related losses in July. Most of the sectors reported reductions less than the 10-year average with the exception of arts, entertainment and recreation (-1,100). Losses in this sector were greater than the 10-year average, due mostly to the record hiring that occurred during the 2004-05 tourist season.

Educational and health services had a loss in July of 2,400 jobs. While educational services (-2,600) and social assistance (-100) followed the seasonal trend, health care moved against the seasonal norm with a gain of 300 jobs. The education and health services super sector showed 12-month growth of 14,400 jobs.

Manufacturing reported less-than-10-year average losses in July with a decrease of 100 jobs. These losses were the result of less-than-normal reductions in non-durable goods (-200) and fabricated metals (-100).

Elsewhere in manufacturing, computer and electronic equipment had a gain of 200, while aerospace products and parts were unchanged. Despite manufacturing's over-the-year loss of 700 jobs, durable goods showed signs of improvement with an annual gain of 400 jobs.

Natural resources and mining reported a sharp loss of 1,200 jobs. The unusual 13 percent monthly reduction was the result of a labor dispute in metal ore mining (-1,200).

Information reported a loss of jobs (-200) for the second consecutive month. These losses were primarily the result of the continuing consolidation process in telecommunications (-400). Over-the-year decreases totaled 2,100 jobs in July for this sector. Since the most recent peak level of employment in February 2001, this sector has lost 6,300 jobs. Despite weakness in telecommunications, the publishing sector has been showing slight signs of improvement with over-the-month (+100) and over-the-year (+100) gains.

In conclusion, Arizona's economy experienced mostly seasonal-related job losses in July, and the majority of these were less than the 10-year average. Meanwhile, job gains were reported in five out of 11 major industry groups. Over the past 12 months, Arizona has gained 98,500 nonfarm jobs, or growth of more than 4 percent. And when compared with all states, Arizona has maintained the second-fastest over-the-year job growth rate for the first seven months of 2005.

Equal Opportunity Employer/Program

Under the Americans with Disabilities Act (ADA), the department must make a reasonable accommodation to allow a person with a disability to take part in a program, service, or activity. For example, this means that if necessary, the department must provide sign language interpreters for people who are deaf, a wheelchair-accessible location, or enlarged print materials. It also means that the department will take any other reasonable action that allows you to take part in and understand a program or activity, including making reasonable changes to an activity. If you believe that you will not be able to understand or take part in a program or activity because of your disability, please let us know of your disability needs in advance if at all possible. This document is available in alternative formats by contacting the Arizona Department of Economic Security, Research Administration, at (602) 542-3871.
